NOTES

“Rank is maintained for 1 year from next April 1st each time rank is achieved” - column 7.

The interpretation of this is that the highest Seminar Rank achieved during the seminar year (April 1st to March 31st) becomes the Recognition Rank for the following year.

That is, as the Distributor improves her Seminar Rank during the year, so is the Recognition Rank improved from that moment.

At the end of the seminar year, the Recognition Rank achieved will be the Recognition Rank for the following year.

But if the Seminar rank achieved at the end of the current year is less than the Recognition Rank held in that year then the Recognition Rank for the following year is reduced to that of the Seminar Rank.

The Seminar “in waiting” Ranks (Royal in Waiting as well as those unofficial “in waiting” device markers) are carried over from March into April. In the expectation that the end-of-year Seminar Rank may be improved – and hence possibly the end-of-year Recognition Rank).

But if April does not provide the second consecutive month for the “in waiting”, then the Seminar Rank does not improve.

On the 1st April all Seminar Ranks return to “D” for “Distributor”.

The exception is the “in waiting” positions, as described above, which will cause the Seminar Rank to return to “D” on 1st May.

The 300PV of both Distributor and Downline orders are cumulative over the month, not a 300PV single order, for Rank eligibility.

* The two conditions for Crown Princess/Prince of (1) 5 x 1st, 2nd, 3rd, 4th, & 5th Lines of 300PV each in 2 consecutive months, and (2) 500,000 GSV PV, do not have to be achieved at the same time but must occur in the same Seminar year. The condition (1) that achieves Princess/Prince does not have to be repeated when condition (2) is achieved unless they are in separate Seminar years.
