

MakeSense® Cream Contour & Highlight Duos

Achieve a sculpted, defined and photo-ready makeup look with MakeSense Cream Contour & Highlight Duos! These creamy duos contain SenePlex+ Complex® and combine long-lasting color technology in shades perfectly suited to contour and highlight a variety of skin tones.

Each duo includes a vial of cream contour shade and a vial of cream highlight shade. The contour shades are matte in finish, while the highlight shades are semi-matte, with a very subtle, soft-focus, illuminating texture. The duos are available in 3 options: light, medium and deep. They include a doe foot applicator to easily, precisely, and quickly apply the product to the desired areas on your face.

The formulas are cream to powder, perfectly blend-able, build-able, and long-lasting like all SeneGence cosmetics. These cream contour and highlighting shades glide and blend onto the skin, giving an even, natural-looking finish that defines and highlights your best features.

Key Benefits

- Cream-to-powder formulas perfectly and easily blend onto skin to define and highlight your best features
- Long-lasting coverage
- Non-comedogenic
- Formulated with SenePlex+ for anti-aging benefits
- Formulated without: Gluten, Parabens, or Animal By-Products

Directions for Use

Following foundation, apply the contour cream in the areas on the face desired to add depth and shadow. Blend well with a contour brush.

Following contour, apply the highlighter cream to the areas on the face desired to illuminate and highlight. Blend well with a contour brush.

Suggested Uses & Application Tips

For the nose:

-Using the Cream Contour shade, apply two lines down the sides of your nose, starting near the beginning of your brow and ending at the tip of your nose. Blend well.

-Using the Cream Highlight shade, apply a thin line from the top to the ball of your nose and blend. This technique will slim and straighten the look of your nose.

For the cheeks:

-Suck in your cheeks to find the hollow of your cheek. Apply Cream Contour from your ear to the corner of your mouth in the hollow, and blend well to create the illusion of shadow and a slimmer face.

-Apply BlushSense® right above the contoured line, on the apples of your cheeks, to create a naturally flushed look.

- Apply and blend the Cream Highlight shade on the tops of your cheekbones to bring them forward.

For the forehead:

-To make your forehead appear smaller, apply the Cream Contour up into your hairline and blend until seamless.

-Using the same brush, bring the Cream Contour down towards your temples. This has a slimming effect on your face.

For the jawline:

-Apply the Cream Contour shade underneath your jawline for a more sculpted look.

FAQ's

What order should this product be applied?

The Cream Contour & Highlight shades can be applied following MakeSense Foundation application. Finish with Translucent Powder if desired.

How long will one vial last in usage?

This depends on how many areas you are contouring and highlighting, and how much product you are using. However, with once daily use, your duo can last up to 4 or 5 months before needing to be repurchased.

Are these different from ShadowSense® shades that I use to contour and highlight?

While ShadowSense also works great to do double duty as contour and highlight, yes, these Cream Contour and Highlight formulas are unique and different than ShadowSense. They are formulated to be slightly creamier, extremely blend-able, and designed in shades specifically for contouring and highlighting light, medium and deep skin tones.

How do I know which duo is right for my skin tone?

These duos come in 3 options - light, medium and deep. The Light duo works well for fair to light complexions OR for those who desire a very subtle effect. The Medium duo works well for light-medium to medium complexions OR for those who desire a somewhat subtle effect. Finally, the Deep duo works well for medium to deep complexions OR for those who desire a more dramatic effect.

All Cream Contour shades are neutral in undertone, while the Cream Highlight shades are neutral to warm in undertone, for a natural looking, warm glow.
