

Golden Radiance Peel-Off Mask

SeneGence® Golden Radiance Peel-Off Mask with SenePlex™ is infused with genuine colloidal gold and soothing botanicals that work to firm, soften, and moisturize skin to reveal a more radiant and youthful-looking complexion. Its rich, glowing golden color looks beautiful when applied on skin, and when gently peeled off, skin is left feeling refreshed and rejuvenated. Brightening ingredients also help to even skin tone and texture for a healthy-looking complexion. This item is part of SeneGence Spa which includes products that address and improve the suppleness, texture, and appearance of skin. SeneGence Spa seeks to relax the user and provide a sense of pampering and well-being.

The Science Behind the Product

Golden Radiance Peel-off Mask includes the proprietary anti-aging complex, SenePlex+, in addition to rich antioxidants and botanicals that help to make skin more luminous. Its rich formula is infused with genuine colloidal gold. Colloidal gold is simply a suspension of nanoparticles of pure gold in a fluid. Our formula specifically uses MVP Golden Collagenine, which works to improve skin elasticity for a lifted and firmed complexion. MVP Golden Collagenine contains the peptide Acetyl Heptapeptide-9, which is essential for collagen and elastin production in skin.

This sophisticated mask is also formulated with Bioyouth™–Brice, a powerful complex which includes brown rice and yeast containing an abundance of active polypeptides that can be quickly absorbed by the skin, helping to improve overall appearance for a beautiful, glowing complexion.

Rich in various anti-oxidant ingredients, this complex can scavenge free radicals, helping to prevent and diminish signs of aging in skin. It is also effective in helping to even skin tones and brighten dull skin. In the process of fermentation, many kinds of NMFs (Natural Moisturizing Factors, like oligosaccharides, amino acids and lactic acid) are released. These NMFs are easily and rapidly absorbed by the skin, helping to increase its moisture.

Additionally, the complex UGL-II PF (comprised of Glucosamine HCl, algae extract, and yeast extract) works to firm, smooth, and hydrate the skin.

This unique complex can also help to:

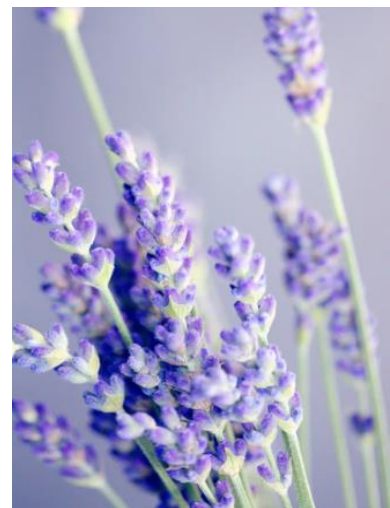

- Reduce the appearance of wrinkles
- Reduce sagging
- Increase skin clarity
- Increase integral firmness (the firmness at deeper layers of the skin)

Lastly, botanical extracts such as *Lavandula Angustifolia* (Lavender) Extract and *Corallina Officinalis* (Seaweed) Extract help to deeply soothe and soften the skin.

Golden Radiance Peel-off Mask is:

- Paraben-free
- Gluten-free
- Animal by-product-free

Key Ingredients and Benefits

Golden Radiance Peel off Mask is made of a combination of ingredients. Here are a few key components:

SenePlex+ Complex: Restores the youthful appearance of skin while encouraging new cellular growth.

MVP Golden Collagenin – Complex of Water (Aqua), Xanthan Gum, Acetyl Heptapeptide-9 (and) Colloidal Gold: This technology turns gold into a protective shield that helps anti-aging peptides to improve the firmness and elasticity of skin. These peptides are essential for synthesis of collagen and elastin.

Bioyouth™-Brice (Saccharomyces/Rice Ferment Filtrate): A skin-beneficial complex developed using brown rice as the substrate and a unique yeast as a fermenting strain. After fermentation, the nutrients in brown rice can be released, transformed and accumulated. Brice contains abundance of active polypeptides, amino acids, lactic acid, phytic acid, ferulic acid, phytate, sterols, and other active factors. These active factors can be quickly absorbed by the skin, improving overall skin appearance and moisturization.

UGL-II PF – Complex of Glucosamine HCl (and) Laminaria Digitata (Algae) Extract (and) Saccharomyces Cerevisiae (Yeast) Extract (and) Urea (and) Water: A bioengineered complex that helps firm and reduce the appearance of wrinkles on the skin. This anti-aging complex also provides smoothing, hydrating, clarifying, and anti-sagging benefits.

Corallina Officinalis (Seaweed) Extract: Helps prevent aging by hydrating, tightening, and toning the skin.

Lavandula Angustifolia (Lavender) Extract: A natural herb found to be relaxing. Its anti-bacterial and antifungal benefits soothe inflamed skin. Because it regulates sebum production, it is useful for all skin types.

Laminaria Digitata (Algae) Extract: Hydrates and softens the skin. It is essential in the penetration of the top layer of the stratum corneum.

Saccharomyces Cerevisiae (Yeast) Extract: A skin-conditioning agent used in cosmetics and beauty care products because of its ability to act in oxidative stress and improve skin conditions.

Salix Alba (Willow) Bark Extract: A natural ingredient that provides anti-acne properties, sebum control, and can be used as an exfoliant.

Caffeine: An antioxidant most shown to repair damage and slow the aging process.

Glycerin: A solvent, an emollient, and humectant that helps keep moisture in the formula and helps the product to spread better across a surface – reducing drag and pull.

Glucosamine HCL: Enhances the production of collagen.

Pentylene Glycol: Skin-conditioning agent and solvent used as the base delivery system.

Directions for Use

After cleansing, apply an even, medium to thick layer to skin, using either a mask applicator or clean fingers. Avoid hairline, eye area, and lips. Let mask sit for 20 minutes, or until completely dry, before gently peeling off. Rinse with water to remove any residue and follow with SeneGence DayTime or Evening Moisturizer. Use twice weekly or as desired.

FAQs

Q: Can you describe the scent and texture?

A: The mask has a gold-metallic finish when applied with a light scent that complements other SeneGence skincare products.

Q: How is this product different from Detoxifying & Moisturizing Mask?

A: Detoxifying & Moisturizing Mask serves a different function than Golden Radiance Peel off Mask. While Detoxifying & Moisturizing Mask is specifically formulated to remove impurities from pores to reveal smoother-looking skin; Golden Radiance Peel off Mask is specifically formulated to instantly firm and moisturize skin for a radiant, glowing complexion.
