The Science Behind the Product

Moisturizing Body Wash is a rich, lathering gel wash that effectively cleanses the skin on your body. It not only does not strip your skin of moisture, but it imparts hydrating ingredients to your skin.

Moisturizing Body Wash cleanses while offering moisturization with the help of added ceramides. Ceramides are naturally occurring lipids that make up over 50% of our skin's composition. They serve an important role in the structure and help protect the skin barrier from moisture loss. With age and environmental exposure, our skin experiences a steep decline in ceramide levels, causing it to look and feel dry, dull, and cracked.

Our body wash includes ceramides to help enhance the skin's barrier and prevent precious moisture from escaping. The addition of rich moisturizing shea butter, hydrating Nangai oil, Sodium Hyaluronate, and botanical extracts like prickly pear flower and aloe vera leaf juice aid in further conditioning and hydrating for soft, smooth skin.
