

Corrective Color Concealer

Our creamy Corrective Color Concealers with SenePlex+® are the perfect answer to any skin imperfection. They can be used to color camouflage changes in pigmentation, blur fine lines, disguise broken capillaries, and to minimize the appearance of deep shadows or bruising. Please refer to the current SeneGence Beauty Book for selection offering.

White Concealer/Blender is a white creamy color pigment that can be used to lighten any creamy shade of SeneGence Cosmetics or use on top of MakeSense Foundation as a highlighter. Corrective Color Concealers are blended with advanced anti-aging ingredients for perfect coverage and skin hydration, all in one amazing product.

The Science Behind the Product

These creamy cosmetics provide beneficial skin ingredients, in addition to fantastic color corrective benefits, through our proprietary SenePlex+. The formula consistency provides even coverage to conceal skin imperfections or highlight if desired. Each Concealer shade works by using opposing colors to counteract specific flaws.

- Fair, Light, Light-Medium, Medium, Medium-Deep and Deep Concealers contain neutral to warm undertones to help camouflage deep purple shadows, dark spots, under-eye circles, skin unevenness and discoloration.
- Green Concealer contains mint green pigment to even out the appearance of redness due to flushed skin, broken capillaries, or blemishes.
- White Concealer is used to highlight or blend with other creamy Cosmetics to create custom shades.

Corrective Color Concealer is packaged in an airless bottle that reduces the probability of product contamination and allows maximum dispensing.

Key Benefits

- Highly pigmented formula- a little goes a long way.
- Super creamy and blendable for a natural look.

- Long-lasting, water resistant and smudge resistant.
- Contains skin-loving ingredients.
- Formulated without: Gluten, Parabens, or Animal By-Products

Key Ingredients

Vitamins B and E: Aid in protecting skin from environmental stressors and soften the appearance of fine lines and wrinkles.

Sodium Hyaluronate: Helps to attract and restore skin's hydration, promoting a more revitalized and youthful-looking complexion.

Aloe Vera Leaf Juice: Natural plant extract which is soothing and hydrating.

SenePlex+: Powerful proprietary complex that helps reduce the signs of aging.

Directions for Use

To use as a concealer- Corrective Color Concealers can be applied before or after MakeSense Foundation. Stipple directly on to affected skin area with a makeup brush, blender sponge, or clean fingertip. If needed, apply another light layer of chosen Concealer, then top with a touch of base foundation to completely blend.

To use as a highlighter- apply White Corrective Color Concealer after MakeSense Foundation to chosen areas to highlight. Or, for a subtler highlighter, blend with a drop of MakeSense Foundation before application. White can be used as a highlighter, blender, and a concealer. Because of its blending capabilities, any shade and degree of highlighting and concealing may be achieved.

Tip: For first use, make sure to prime the pump well by pumping several times until product dispenses.

Remove by using Fooops![®] Color Remover Liquid or Wipes.

FAQ's

What types of skin can use this product?

Corrective Color Concealer is suitable for all skin types.

How long will one bottle last in usage?

This will depend on how often you use the product. With once daily use at one pump per use, your Concealer can last up to 2 months before needing to repurchase.
